

## Chapter 14: Floors

1. What are the functions of a floor?

---

---

---

---

2. What is the difference between a solid ground floor and a suspended ground floor?

---

---

---

---

3. Explain, using a neat annotated sketch, the structure of a solid ground floor (see 14.01).

4. Explain, using a neat annotated sketch, the structure of a suspended timber ground floor (see 14.04).

5. Describe Radon.

---

---

---

6. Why is Radon dangerous?

---

---

---

---

7. The amount of Radon entering a house depends on...

---

---

---

---

---

---

---

8. Explain, using notes and a neat annotated sketch how a radon membrane and a radon sump prevent the ingress of Radon.

---

---

---

---

---
